

THERE'S A BETTER WAY.

/// Sync Health Plan TPA by Contigo Health, LLC, provides your health system employees access to high-quality care at a manageable expense.

Healthcare coverage is one of the most important benefits employers provide to their employees. And you need a plan that is there for your employees when they need quality care and the ability to get back to their lives more quickly. But as the cost of care continues to rise, employers find it harder to bend the curve.

Contigo Health® has found a way to help make that happen.

Contigo Health Sync Health Plan TPA™ empowers self-funded health system employers with a flexible approach to employee benefits to help improve overall health outcomes and help achieve cost savings. Contigo Health tailors specific benefits to health systems who want to innovate and optimize domestic utilization, incentivizing their employees to stay within their own high-quality health system for care. Employees get access to great in-network care, along with the confidence that their confidential patient information is safe and private.

Leverage ConfigureNet Out-of-Network Wrap™.
Our geographic coverage spans all 50 states, including contracts with over 900,000 providers across 4.1 million U.S. locations.

We do this through:

- // Integration with existing population health management programs, PBMs, ACOs, and clinically integrated networks
- // Flexible options in benefit design built to optimize domestic utilization
- // Tailored care management programs including case and disease management, biometric screening programs, management, and maternity
- // Strong employee satisfaction, providing great service to your employees and their families
- // Reporting tools so that employers can see the performance of their health plan and identify areas for improvement

In addition to supporting quality care, we get results. We've increased domestic utilization year over year for many of the health systems we support.

Want even better news? We'll be there to help you implement your new health plan every step of the way. We uncomplicate the complicated to create a smooth transition for you and your employees.

Building New Partnership Opportunities

Sync Health Plan TPA by Contigo Health also prepares health systems to take advantage of direct-to-employer engagements. By starting with your employees, health systems have a built-in road map and the internal capabilities to make their offerings even more attractive to other self-funded employers in the area.
